PROBLEM STATEMENT INDIAN/GLOBAL

01

Rural clinics struggle with initial diagnosis due to inadequate equipment.

02

Lack of experienced and qualified doctors, distance & transportation issues.

03

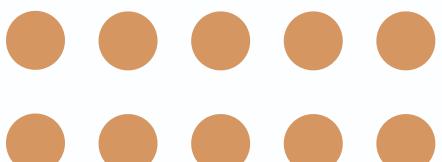

Delays due to limited doctor availability and long appointment wait times globally

04

Chronic diseases like BP, diabetes, and TB often go undiagnosed for long.

05

Globally unavailability of one-stop solution for treating all critical illnesses & Medical Tourism

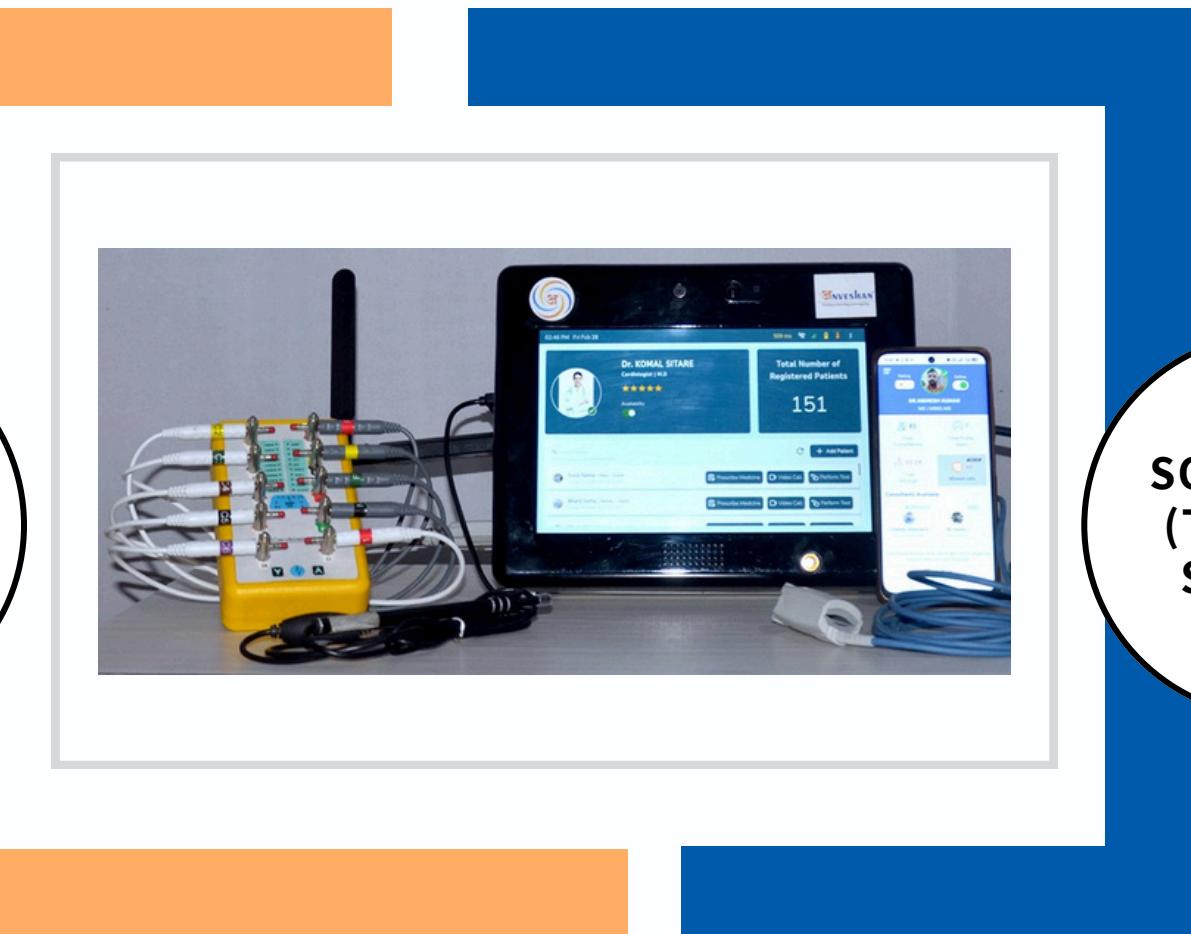

SOLUTION

WE OFFER A DIGITAL, SECURE & ROBUST ECOSYSTEM FOR REMOTE PATIENT MONITORING DEVICE

- 10.1' Touch screen
- 12 Lead ECG
- NIBP, SPO2, HR/PR, Temperature
- Dual Function Camera & Camerascope (with light source)
- Connectivity with Bluetooth, Wifi , LAN
- Compatible with 4G and 5G SIM cards
- Enables Glucometer & HB Device
- Device can be operated even without network.

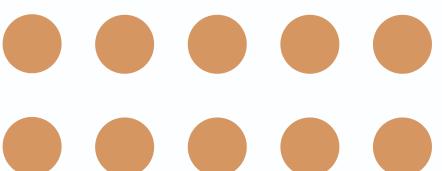

HARDWARE
(RPM DEVICE)

SOFTWARE
(THE ECO-SYSTEM)

- Connects patients and doctors virtually
- Manages profiles and appointments
- Sends digital prescriptions
- Reminds patients to take medicines
- Safely stores data in the cloud
- Available on iOS & Android (beta)

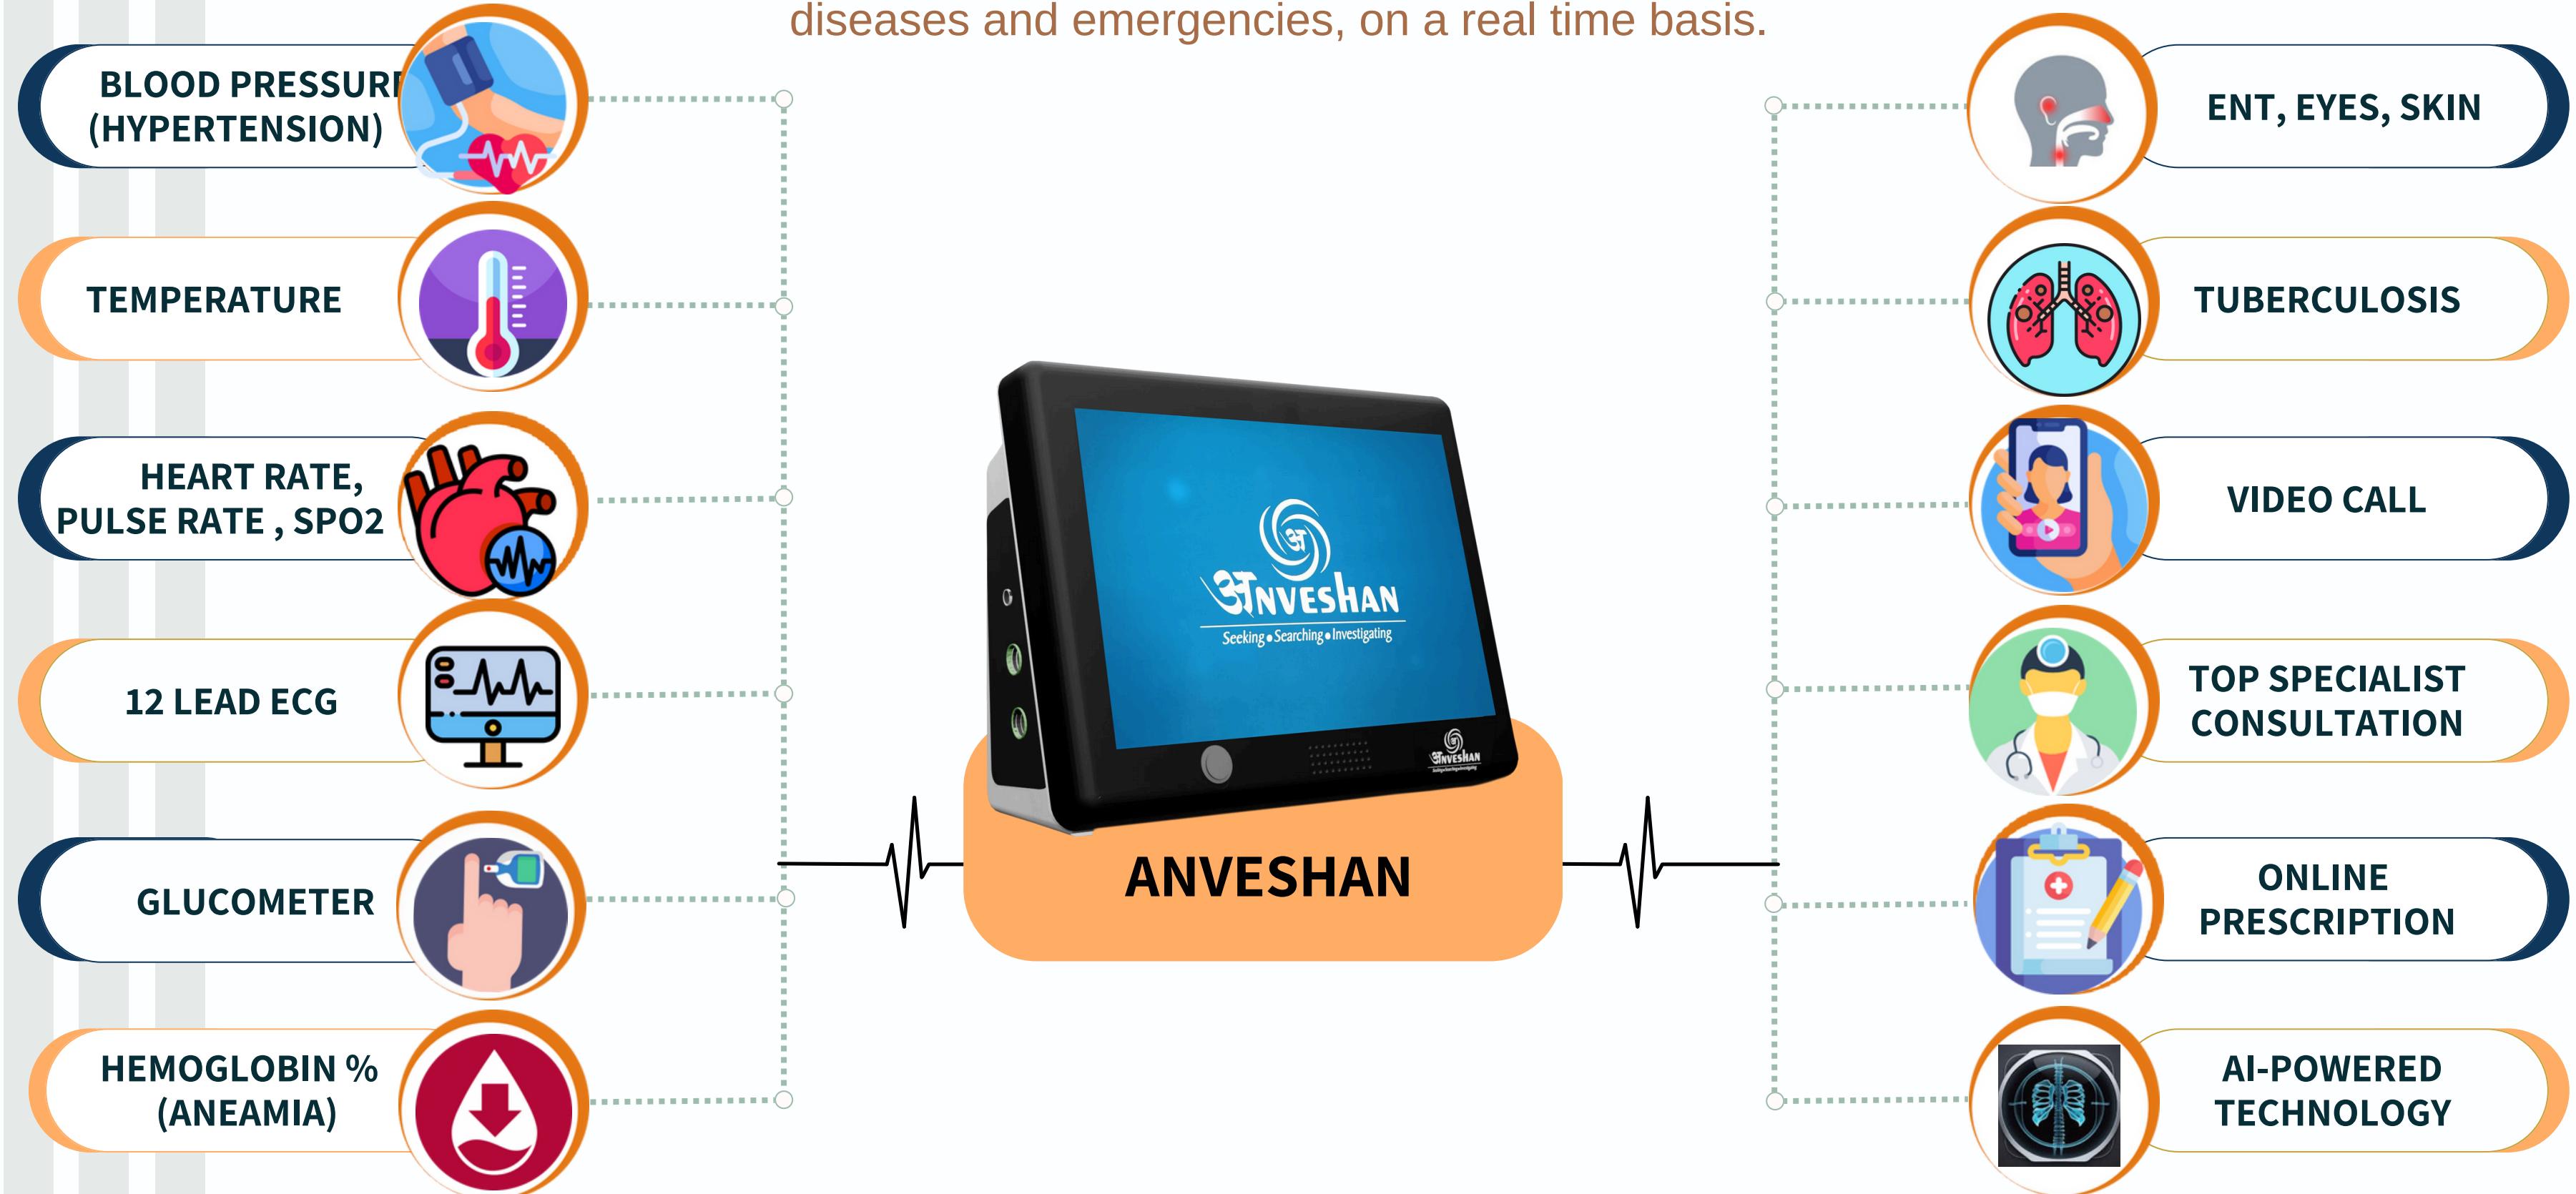

RECENTLY ADDED NEW FEATURE - PORTABLE HAND HELDX-RAY INTEGRATION- INSTANT REAL TIME DIAGNOSIS OF DISEASES LIKE TUBERCULOSIS AND BONE INJURIES (FRACTURES).

PRODUCT & FEATURES

We provide a single platform solution for various chronic diseases and emergencies, on a real time basis.

REQUIREMENTS OF ANVESHAN IN GLOBAL HEALTHCARE DISPARITIES

Limited Access to Healthcare in Remote Areas

- 3.5 billion people lack access to essential health services (WHO, 2023)
- Rural and underserved regions face severe shortages of clinics, staff, and equipment

Rising Burden of Non-Communicable Diseases (NCDs)

- Hypertension, diabetes, and cardiac issues are rising globally, especially in LMICs
- Early detection is often missed due to lack of routine diagnostics

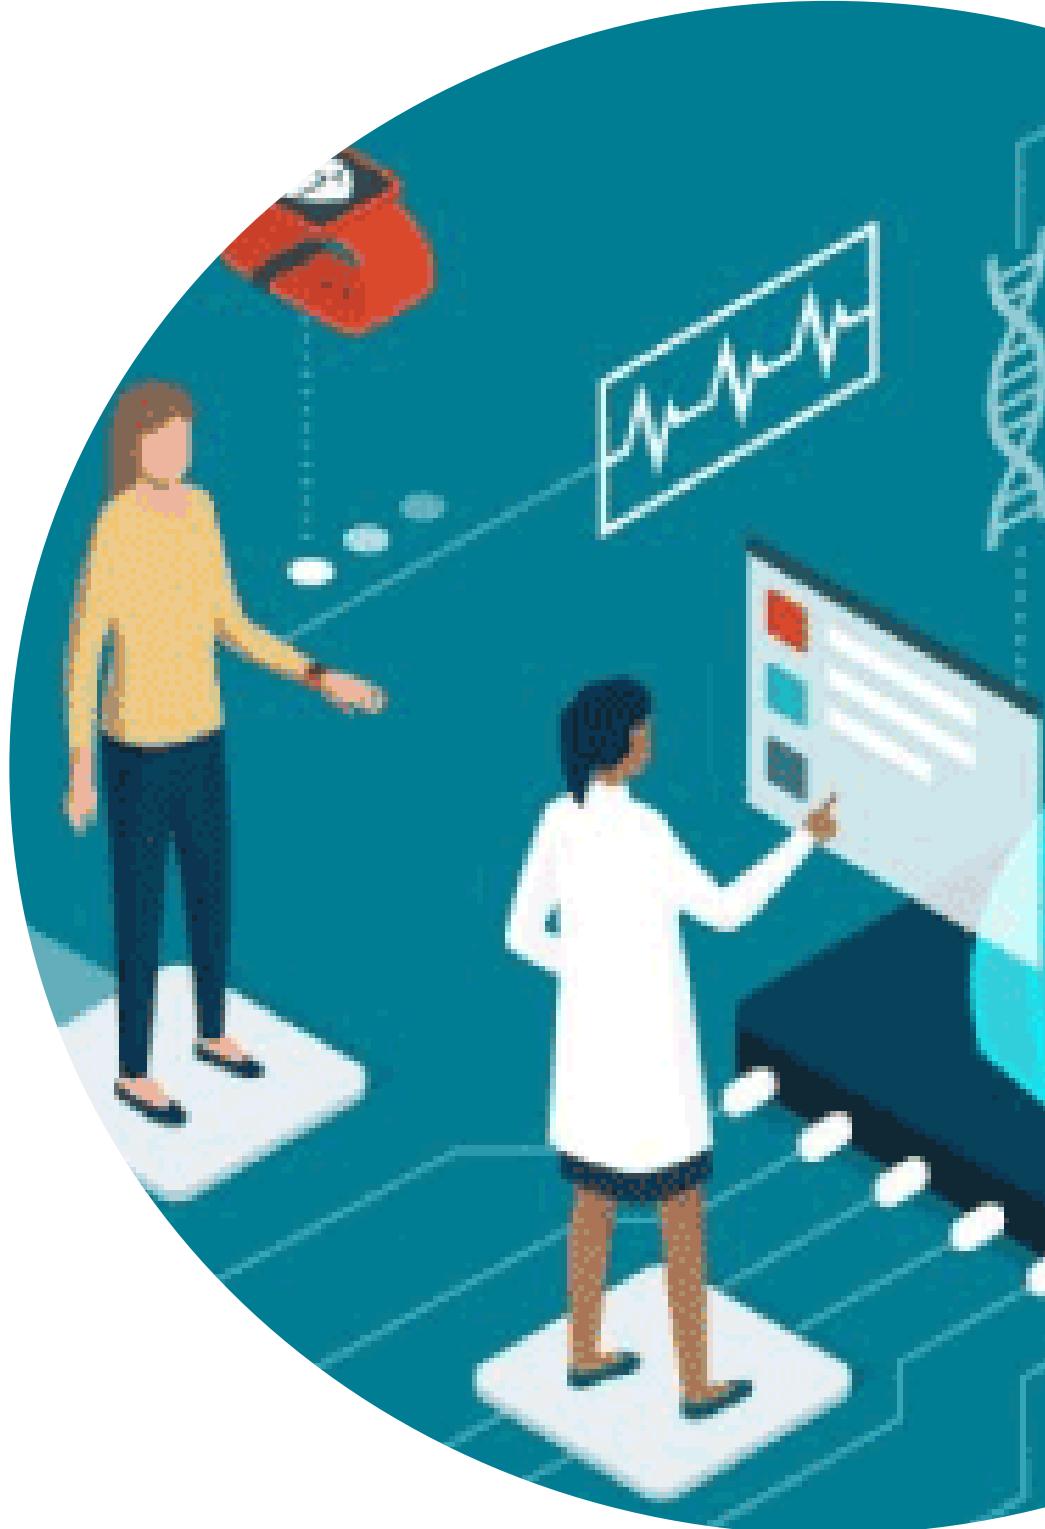

Overburdened Health Systems Post-COVID

- Inadequate infrastructure for triaging, early screening, or teleconsultations
- Fragmented data management and delays in patient interventions

Healthcare Workforce Shortages

- Global shortfall of 10 million health workers projected by 2030 (WHO)
- Heavy reliance on frontline workers with limited diagnostic tools
- Unavailability of Appointments in timely manner
- Restricted Medical help during communte

58%
Urban Population
4.77 Billion

40-50% of world's population lacks timely treatment for chronic diseases.

@Data reference from world meter reports.

A global study in 2025 found that over 85% of individuals aged 60+ have at least one chronic disease, with prevalence higher in urban areas (around 90%) than rural areas (around 75%). Hypertension and diabetes together account for over 60% of these conditions.
